MEET A GROWING COMMUNITY NEED

A UNIQUE ARCHITECTURAL
AND PHILOSOPHICAL APPROACH

in the spirit of
CHRISTIAN LOVE

Eldercare in the spirit of Christian love with a commitment to innovation is what sets Wesley Meadows apart.

As a member of the Methodist Senior Services network, our commitment continues with the planned construction of a Green House® Home, the first in North Mississippi dedicated to those living with forgetfulness.

DREAM

FOCUS ON LIVING & LIFE...

With its new Green House® Home, memory support assisted living at Wesley Meadows will be unlike any other offered in North Mississippi. Methodist Senior Services pioneered the Green House® Home concept. Our dream is to use this innovative approach for memory support - a comprehensive approach to elder living that provides long-term, intensive, specialized support for seniors experiencing forgetfulness.

The new Green House® Home will:

- improve quality of life, well-being and engagement by pairing Green House® Home design and Eden Alternative Principles®, an internationally recognized model for elder care*
- create an assisted living home for 10 residents, with private rooms and private baths*
- provide high levels of support, a variety of daily activities, and consistency in routine*
- create an atmosphere that fosters interaction and engagement while also supporting independence*

ACHIEVE

Wesley Meadows
Retirement Community

WE MUST ADDRESS THIS GROWING NEED IN DESOTO COUNTY.

The Wesley Meadows Retirement Community is nestled in a quiet 30-acre meadow in Hernando. Yet, it is located in one of the fastest growing counties in the state of Mississippi.

According to the University of Mississippi Medical Center MIND Center, more than 52,000 Mississippians have Alzheimer's or other forms of memory impairment. This number could double by 2030.

THE GREEN HOUSE® HOME APPROACH

Proven model

Methodist Senior Services has been a leader in providing service ministry to elders in Mississippi for 55 years. Its experiences in its 12 senior communities across Mississippi inform and benefit Wesley Meadows residents in Hernando.

Research-based outcomes

Methodist Senior Services employs the Eden Alternative® Principles for memory support care. This model is backed by research and based on very positive outcomes.

Meaningful life in a real home

Elders living in a Green House® Home thrive in a familial experience. They live in a real, welcoming home not a “home-like” environment or institutional setting. Flexible routines that reflect their personal preferences set the rhythm of the day.

Care from a specially trained team

Care in a Green House® Home is provided by specially trained team members known as a “Shahbaz,” a Persian word meaning “royal falcon.” The role of each Shahbaz is to protect, sustain and nurture elders and the home they live in. They provide daily care, prepare meals and maintain the household.

INSPIRE

A volunteer Capital Campaign Steering Committee of North Mississippi residents is working together to share this story and inspire the financial support of individuals, businesses and foundations. Architects and contractors estimate the cost of creating a Green House® Home at Wesley Meadows to be \$1.5 million.

During this capital campaign, pledges and contributions can be made over a 3-year period. In addition to cash, gifts of appreciated stock and bonds can be contributed.

With your investment, we will build a home for our treasured elders in North Mississippi living with forgetfulness.
